TITLE: THE JOURNAL OF CELL BIOLOGY

REEL NO: 1 of 2

VOLUME: 98 issues: 1-6

DATE: January - June 1984

PUBLICATION NO: 12,246.01

NOTES: Includes:
INDEX
CONTENTS

THIS PERIODICAL MAY BE COPYRIGHTED, IN WHICH CASE THE CONTENTS REMAIN THE PROPERTY OF THE COPYRIGHT OWNER. THE MICROFORM EDITION IS REPRODUCED BY AGREEMENT WITH THE PUBLISHER. DUPLICATION OR RESALE WITHOUT PERMISSION IS PROHIBITED.

UNIVERSITY MICROFILMS INTERNATIONAL, ANN ARBOR, MICHIGAN

AUTHOR INDEX

A

Ackerann, M. *See* Matus, Ng, Pehling, Ackerann, and Hauser.
Adams, A. E. M., and Pringle, J. R. Relationship of actin and tubulin distribution to bud growth in wild-type and morphogenetic mutant *Saccharomyces cerevisiae*. 934.
—, *See* Kilmartin and Adams.
Aggeler, J., Frisch, S. M., and Werb, Z. Changes in cell shape correlate with collagenase gene expression in rabbit synovial fibroblasts. 1662.
—, **Frisch, S. M., and Werb, Z.** Collagenase is a major gene product of induced rabbit synovial fibroblasts. 1656.
Aikawa, M. *See* Leech, Barnwell, Aikawa, Miller, and Howard.
Akabas, M. H., Cohen, F. S., and Finkelstein, A. Separation of the osmotically driven fusion event from vesicle-planar membrane attachment in a model system for exocytosis. 1063.
—, *See* Cohen, Akabas, Zimmerberg, and Finkelstein.
Albertini, D. F. *See* Herman and Albertini.
Albrecht, R. M. *See* Loftus, Choate, and Albrecht.
Allan, J., Rau, D. C., Harborne, N., and Gould, H. Higher order structure in a short repeat length chromatin. 1320.
Allen, R. H. *See* Levine, Allen, Alpers, and Seetharam.
Allis, C. D. *See* Wenkert and Allis.
Alpers, D. H. *See* Levine, Allen, Alpers, and Seetharam.
Altmann, G. G. *See* Uddin, Altmann, and Leblond.
Amherdt, M. *See* Orci, Ravazzola, Amherdt, Yanaihara, Yanaihara, Halban, Renold, and Perrelet.
Andersson, K., Björkroth, B., and Daneholt, B. Packing of a specific gene into discrete higher order structures following repression of RNA synthesis. 1296.
Antoine, J.-C. *See* Goud and Antoine.
Appel, S. H. *See* Bursztajn, McManaman, and Appel.
Arsenault, A. L., and Ottensmeyer, F. P. Visualization of early intramembranous ossification by electron microscopic and electron spectroscopic imaging. 911.
Asai, D. J. *See* Thompson, Asai, and Carney.
Ashwell, G. *See* Wolkoff, Klausner, Ashwell, and Harford.
Atkinson, P. H., and Lee, J. T. Co-translational excision of α-glucose and α-mannose in nascent vesicular stomatitis virus G protein. 2245.
Aynardi, M. W., Steinert, P. M., and Goldman, R. D. Human epithelial cell intermediated filaments: isolation, purification, and characterization. 1407.
Azzarone, B., Suarez, H., Mingari, M.-C., Moretta, L., and Fauci, A. S. 4F2 Monoclonal antibody recognizes a surface antigen on spread human fibroblasts of embryonic but not of adult origin. 1133.

B

Bainton, D. F. *See* Stenberg, Shuman, Levine, and Bainton.
Baird, B. *See* Menon, Holowka, and Baird.
Bard, E. *See* Rodriguez-Boulan, Paskiet, Salas, and Bard.
Barnwell, J. W. *See* Leech, Barnwell, Aikawa, Miller, and Howard.
Barondes, S. H. *See* Cerra, Haywood-Reid, and Barondes.
Bateman, J. L. *See* Klausner, van Renswoude, Kempf, Rao, Bateman, and Robbins.
Baudhuin, P. *See* Courtoy, Quintart, and Baudhuin.
—, *See* Opperdoes, Baudhuin, Coppens, De Roe, Edwards, Weijers, and Misset.
—, *See* Quintart, Courtoy, and Baudhuin.
Bauer, H. C. *See* Sonderegger, Fishman, Bokoum, Bauer, Neale, and Nelson.
Beaven, M. A. *See* Hesketh, Beaven, Rogers, Burke, and Warren.
Beckerle, M. C. Microinjected fluorescent polystyrene beads exhibit saltatory motion in tissue culture cells. 2126.
Bedard, D. P. *See* Singer, Bedard, and Johnston.
Bee, J. A. *See* Mollenhauer, Bee, Lizarbe, and von der Mark.
Benson, S. C. *See* Leitman, Benson, and Johnson.
Bernard, B. A. *See* Chen, Olden, Bernard, and Chu.
Berns, M. W. *See* Koonce, Cloney, and Berns.
Bibor-Hardy, V. *See* Laliberté, Dagenais, Filion, Bibor-Hardy, Simard, and Royal.
Birshtein, B. K. *See* Kenter, Warren, Shields, and Birshtein.
Bissell, M. J. *See* Lee, Parry, and Bissell.
Björkroth, B. *See* Andersson, Björkroth, and Daneholt.
Blank, M. *See* Small, Blank, Ghez, and Pfenninger.
Blankenberg, T. *See* Friedman, Blankenberg, Sensabaugh, and Tenforde.
Blest, A. D. *See* de Couet, Stowe, and Blest.
Bloom, B. R. *See* Nagata, Rosen, Makman, and Bloom.
Bloom, G. S., Luca, F. C., and Vallee, R. B. Widespread cellular distribution of MAP 1A (microtubule-associated protein 1A) in the mitotic spindle and on interphase microtubules. 331.
—, **Schoenfeld, T. A., and Vallee, R. B.** Widespread distribution of the major polypeptide component of MAP 1 (microtubule-associated protein 1)in the nervous system. 320.
Blose, S. H., Meltzer, D. I., and Feramisco, J. R. 10-nm filaments are induced to collapse in living cells microinjected with monoclonal and polyclonal antibodies against tubulin. 847.
Bock, E. *See* Lyles, Norrild, and Bock.
Böck, G. *See* Patzak, Böck, Fischer-Colbrie, Schauenstein, Schmidt, Lingg, and Winkler.
Bokoum, M. *See* Sonderegger, Fishman, Bokoum, Bauer, Neale, and Nelson.
Bolognesi, A. *See* Schwartz, Bolognesi, and Fridovich.
Bonitz, P. *See* Eichner, Bonitz, and Sun.
Borisy, G. G. *See* Keryer, Ris, and Borisy.
Bornstein, P. *See* Mumby, Raugi, and Bornstein.
Bouck, G. B. *See* Chen and Bouck.
Bowers, B. *See* Hohman and Bowers.
Boyer, J. L. *See* Meier, Sztul, Reuben, and Boyer.
Boyles, J. K. *See* Fox, Boyles, Reynolds, and Phillips.
Boynton, J. E. *See* Schmidt, Myers, Gillham, and Boynton.
Brackenbury, R. *See* Greenberg, Brackenbury, and Edelman.
Branton, D. *See* Mueller and Branton.
Brickley-Parsons, D. *See* Landis, Sanzone, Brickley-Parsons, and Glimcher.
Bridgman, P. C., Nakajima, S., Greenberg, A. S., and Nakajima, Y. Freeze-fracture and electrophysiological studies of newly developed acetylcholine receptors in *Xenopus* embryonic muscle cells. 2160.
Brinkley, B. R. *See* Deery, Means, and Brinkley.
Bronner-Fraser, M. Latex beads as probes of a neural crest pathway: effects of laminin, collagen, and surface charge on bead translocation. 1947.
Brown, P. H. *See* Hickman, Theodorakis, Greco, and Brown.
Bumann, J., Wurster, B., and Malchow, D. Attractant-induced changes and oscillations of the extracellular Ca^{++} concentration in suspensions of differentiating *Dictyostelium* cells. 173.
Bunge, R. P. *See* Ratner, Glaser, and Bunge.
Burgess, D. R. *See* Stidwill, Wysolmerski, and Burgess.
Burgoyne, R. D. *See* Cumming, Burgoyne, and Lytton.
Burke, B. *See* Hesketh, Beaven, Rogers, Burke, and Warren.

Burns, C. P., and Rozengurt, E. Extracellular Na^+ and initiation of DNA synthesis: role of intracellular pH and K^+. 1082.
Burnside, B. *See* Porrello and Burnside.
Burridge, K. *See* Mangeat and Burridge.
Bursztajn, S., and Fischbach, G. D. Evidence that coated vesicles transport acetylcholine receptors to the surface membrane of chick myotubes. 498.
—, **McManaman, J. L., and Appel, S. H.** Organization of acetylcholine receptor clusters in cultured rat myotubes is calcium dependent. 507.
Bustin, M. *See* Einck and Bustin.

C

Caliguiri, L. A. *See* Wang, Yin, Krueger, Caliguiri, and Tamm.
—, *See* Wang, Yin, Krueger, Caliguiri, and Tamm.
Campbell, K. P. *See* Jorgensen and Campbell.
Cantor, C. R. *See* Murphy, Powers, and Cantor.
Capco, D. G., Krochmalnic, G., and Penman, S. A new method of preparing embeddment-free sections for transmission electron microscopy: applications to the cytoskeletal framework and other three-dimensional networks. 1873.
Cappuccinelli, P. *See* Rubino, Fighetti, Unger, and Cappuccinelli.
Caput, D. *See* Drubin, Caput, and Kirschner.
Carney, D. H. *See* Thompson, Asai, and Carney.
Carothers Carraway, C. A. *See* Jung, Helm, Carothers Carraway, and Carraway.
Carpenter, G. *See* Stoscheck and Carpenter.
Carraway, K. L. *See* Jung, Helm, Carothers Carraway, and Carraway.
Carroll, R. C. *See* Cox, Carroll, White, and Rao.
Cerra, R. F., Haywood-Reid, P. L., and Barondes, S. H. Endogenous mammalian lectin localized extracellularly in lung elastic fibers. 1580.
Chamberlain, J. W., Pollard, J. W., and Stanners, C. P. Selective synthesis of mitochondrial proteins by Chinese hamster ovary cells severely starved for various amino acids. 1603.
Chen, S., and Bouck, G. B. Endogenous glycosyltransferases glycosylate lipids in flagella of *Euglena*. 1825.
Chen, W.-T., Olden, K., Bernard, B. A., and Chu, F.-F. Expression of transformation-associated protease(s) that degrade fibronectin at cell contact sites. 1546.
Chiquet, M., and Fambrough, D. M. Chick myotendinous antigen. I. A monoclonal antibody as a marker for tendon and muscle morphogenesis. 1926.
—, **and Fambrough, D. M.** Chick myotendinous antigen. II. A novel extracellular glycoprotein complex consisting of large disulfide-linked subunits. 1937.
Choate, J. *See* Loftus, Choate, and Albrecht.
Choi, H. *See* Poole, Pidoux, Reiner, Choi, and Rosenberg.
Chu, F.-F. *See* Chen, Olden, Bernard, and Chu.
Chung, A. E. *See* Wan, Wu, Chung, and Damjanov.
Clark, R. A. F. *See* Singer, Kawka, Kazazis, and Clark.
Clemmons, L. *See* Sargent, Hedges, Tsavaler, Clemmons, Tzartos, and Lindstrom.
Cloney, R. A. *See* Koonce, Cloney, and Berns.
Cochrane, C. G. *See* Jesaitis, Naemura, Sklar, Cochrane, and Painter.
Cohen, B. N. *See* McCue, Gubler, Sherman, and Cohen.
Cohen, D. *See* Nir, Cohen, and Papermaster.
Cohen, F. S., Akabas, M. H., Zimmerberg, J., and Finkelstein, A. Parameters affecting the fusion of unilamellar phospholipid vesicles with planar bilayer membranes. 1053.
—, *See* Akabas, Cohen, and Finkelstein.
Cohen, W. D. *See* Joseph-Silverstein and Cohen.
Colvin, R. B. *See* Fujikawa, Foster, Gipson, and Colvin.
Connolly, J. L., Green, S. A., and Greene, L. A. Comparison of rapid changes in surface morphology and coated pit formation of PC12 cells in response to nerve growth factor, epidermal growth factor, and dibutyryl cyclic AMP. 457.
—, *See* Seeley, Rukenstein, Connolly, and Greene.
Cooke, C. *See* Earnshaw, Halligan, Cooke, and Rothfield.
Cooper, J. A. *See* Gould, Cooper, and Hunter.
—, *See* Tseng, Runge, Cooper, Williams, and Pollard.
Coppens, I. *See* Opperdoes, Baudhuin, Coppens, De Roe, Edwards, Weijers, and Misset.
Courtoy, P. J., Quintart, J., and Baudhuin, P. Shift of equilibrium density induced by 3,3'-diaminobenzidine cytochemistry: a new procedure for the analysis and purification of peroxidase-containing organelles. 870.
—, *See* Quintart, Courtoy, and Baudhuin.
Cox, A. C., Carroll, R. C., White, J. G., and Rao, G. H. R. Recycling of platelet phosphorylation and cytoskeletal assembly. 8.
Cramer, E. B. *See* Furie, Cramer, Naprstek, and Silverstein.
Cumming, R., Burgoyne, R. D., and Lytton, N. A. Immunocytochemical demonstration of α-tubulin modification during axonal maturation in the cerebellar cortex. 347.

D

Dagenais, A. *See* Laliberté, Dagenais, Filion, Bibor-Hardy, Simard, and Royal.
Damjanov, I. *See* Wan, Wu, Chung, and Damjanov.
Daneholt, B. *See* Andersson, Björkroth, and Daneholt.
Danø, K. *See* Larsson, Skriver, Nielsen, Hansen, Kristensen, and Danø.

CONTENTS

VOLUME 98 NUMBER 1 JANUARY 1984

Rapid Communications

341 **Identification of coated vesicles in *Saccharomyces cerevisiae*.** S. C. Mueller and D. Branton

347 **Immunocytochemical demonstration of α-tubulin modification during axonal maturation in the cerebellar cortex.** R. Cumming, R. D. Burgoyne, and N. A. Lytton

352 **The kinetochore is part of the metaphase chromosome scaffold.** W. C. Earnshaw, N. Halligan, C. Cooke, and N. Rothfield

358 **Ultrastructural distribution of nuclear ribonucleoproteins as visualized by immunocytochemistry on thin sections.** S. Fakan, G. Leser, and T. E. Martin

364 **A few axonal proteins distinguish ventral spinal cord neurons from dorsal root ganglion neurons.** P. Sonderegger, M. C. Fishman, M. Bokoum, H. C. Bauer, E. A. Neale, and P. G. Nelson

Regular Articles

1 **Correlation between changes in light energy distribution and changes in thylakoid membrane polypeptide phosphorylation in *Chlamydomonas reinhardtii*.** F.-A. Wollman and P. Delepelaire

8 **Recycling of platelet phosphorylation and cytoskeletal assembly.** A. C. Cox, R. C. Carroll, J. G. White, and G. H. R. Rao

16 **Selective migration of terminally differentiating cells from the basal layer of cultured human epidermis.** F. M. Watt

22 **Binding and degradation of platelet thrombospondin by cultured fibroblasts.** P. J. McKeown-Longo, R. Hanning, and D. F. Mosher

29 **Compartmentalization of intracellular membrane glycocomponents is revealed by fracture-label.** M. R. Torrisi and P. Pinto da Silva

35 **Yeast secretory mutants that block the formation of active cell surface enzymes.** S. Ferro-Novick, P. Novick, C. Field, and R. Schekman

44 **Genes required for completion of import of proteins into the endoplasmic reticulum in yeast.** S. Ferro-Novick, W. Hansen, I. Schauer, and R. Schekman

54 **Association of an extracellular protein (chondrocalcin) with the calcification of cartilage in endochondral bone formation.** A. R. Poole, I. Pidoux, A. Reiner, H. Choi, and L. C. Rosenberg

66 **Studies on the spectrum-like protein from the intestinal brush border, TW 260/240, and characterization of its interaction with cytoskeleton and actin.** M. Pearl, D. Fishkind, M. Mooseker, D. Keene, and T. Keller III

79 **Receptor-mediated biliary transport of immunoglobulin A and asialoglycoprotein: sorting and missorting of ligands revealed by two radiolabeling methods.** J. M. Schiff, M. M. Fisher, and B. J. Underdown

90 **Regulation of connective tissue collagenase production: stimulators from adult and fetal epidermal cells.** B. Johnson-Wint and J. Gross.

97 **Submicromolar levels of calcium control the balance of beating between the two flagella in demembranated models of *Chlamydomonas*.** R. Kamiya and G. Witman

108 **Evidence for both prelysosomal and lysosomal intermediates in endocytic pathways.** B. Storrie, R. R. Pool, Jr., M. Sachdeva, K. M. Maurey, and C. Oliver

116 **Tropomyosin-enriched and alpha-actinin-enriched microfilaments isolated from chicken embryo fibroblasts by monoclonal antibodies.** J. J.-C. Lin, F. Matsumura, and S. Yamashiro-Matsumura

128 **Basement membrane components in healing rabbit corneal epithelial wounds: immunofluorescence and ultrastructural studies.** L. S. Fujikawa, C. S. Foster, I. K. Gipson, and R. B. Colvin

139 **Membrane fusion mutants of Semliki Forest virus.** M. C. Kielian, S. Keränen, L. Kääriäinen, and A. Helenius

146 **Modulation of secreted proteins of mouse mammary epithelial cells by collagenous substrata.** E. Y -H. Lee, G. Parry, and M. J. Bissell

156 **Distribution of F-actin during cleavage of the *Drosophila* syncytial blastoderm.** R. M. Warn, R. Magrath, and S. Webb

163 **Investigation of the role of the main light-harvesting chlorophyll-protein complex in thylakoid membranes: reconstitution of depleted membranes from intermittent-light-grown plants with the isolated complex.** D. A. Day, I. J. Ryrie, and N. Fuad

173 **Attractant-induced changes and oscillations of the extracellular Ca^{++} concentration in suspensions of differentiating *Dictyostelium* cells.** J. Bumann, B. Wurster, and D. Malchow

179 **Mechanism of concanavalin A-induced anchorage of the major cell surface glycoproteins to the submembrane cytoskeleton in 13762 ascites mammary adenocarcinoma cells.** G. Jung, R. M. Helm, C. A. C. Carraway, and K. L. Carraway

188 **Intracellular site of U1 small nuclear RNA processing and ribonucleoprotein assembly.** S. J. Madore, E. D. Wieben, and T. Pederson

193 **Two forms of cerebellar glial cells interact differently with neurons in vitro.** M. E. Hatten, R. K. H. Liem, and C. A. Mason

205 **Functional histone antibody fragments traverse the nuclear envelope.** L. Einck and M. Bustin

214 **Physical, immunochemical, and functional properties of *Acanthamoeba* profilin.** P. C.-H. Tseng, M. S. Runge, J. A. Cooper, R. C. Williams, Jr., and T. D. Pollard

222 **Insulin but not C-peptide (proinsulin) immunoreactivity is present in crinophagic bodies of the pancreatic B-cell.** L. Orci, M. Ravazzola, M. Amherdt, C. Yanaihara, N. Yanaihara, P. Halban, A. E. Renold, and A. Perrelet

229 **Genetic dissection of the central pair microtubules of the flagella of *Chlamydomonas reinhardtii*.** S. K. Dutcher, B. Huang, and D. J. L. Luck

237 **Surface antigens of brain synapses: identification of minor proteins using polyclonal antisera.** A. Matus, M. Ng, G. Pehling, M. Ackermann, and K. Hauser

246 **Hydrolase secretion is a consequence of membrane recycling.** T. C. Hohman and B. Bowers

253 **Purification and characterization of oocyte cytoplasmic tubulin and meiotic spindle tubulin of the surf clam *Spisula solidissima*.** K. A. Suprenant and L. I. Rebhun

267 **Cartilage ultrastructure after high pressure freezing, freeze substitution, and low temperature embedding. I. Chondrocyte ultrastructure—implications for the theories of mineralization and vascular invasion.** E. B. Hunziker, W. Herrmann, R. K. Schenk, M. Mueller, and H. Moor

277 **Cartilage ultrastructure after high pressure freezing, freeze substitution, and low temperature embedding. II. Intercellular matrix ultrastructure—preservation of proteoglycans in their native state.** E. B. Hunziker and R. K. Schenk

283 **Three-dimensional structure of a membrane-microtubule complex.** J. M. Murray

296 **Embryonic fibroblast motility and orientation can be influenced by physiological electric fields.** C. A. Erickson and R. Nuccitelli

308 **Intracellular transport of influenza virus hemagglutinin to the apical surface of Madin-Darby canine kidney cells.** E. Rodriguez-Boulan, K. T. Paskiet, R. J. I. Salas, and E. Bard

320 **Widespread distribution of the major polypeptide component of MAP 1 (microtubule-associated protein 1) in the nervous system.** G. S. Bloom, T. A. Schoenfeld, and R. B. Vallee

331 **Widespread cellular distribution of MAP 1A (microtubule-associated protein 1A) in the mitotic spindle and on interphase microtubules.** G. S. Bloom, F. C. Luca, and R. B. Vallee

369 CORRECTION

VOLUME 98 NUMBER 2 FEBRUARY 1984

Rapid Communications

773 **Peripheral neurons and Schwann cells secrete plasminogen activator.** A. Krystosek and N. W. Seeds

777 **Immunocytochemical localization of microtubule-associated protein 1 in rat cerebellum using monoclonal antibodies.** G. Huber and A. Matus

Regular Articles

375 **Intracellular segregation of asialoglycoproteins and their receptor: a prelysosomal event subsequent to dissociation of the ligand-receptor complex.** A. W. Wolkoff, R. D. Klausner, G. Ashwell, and J. Harford

382 **Location of actin, myosin, and microtubular structures during directed locomotion of of *Dictyostelium* amebae.** S. Rubino, M. Fighetti, E. Unger, and P. Cappuccinelli

391 **1,25-Dihydroxyvitamin D_3-induced differentiation in a human promyelocytic leukemia cell line (HL-60):receptor-mediated maturation to macrophage-like cells.** D. J. Mangelsdorf, H. P. Koeffler, C. A. DOnaldson, J. W. Pike, and M. R. Haussler.

399 **Cytochemical localization of terminal *N*-acetyl-D-galactosamine residues in cellular compartments of intestinal goblet cells: implications for the topology of O-glycosylation.** J. Roth

407 **Processing of MOPC 315 immunoglobulin A oligosaccharides: evidence for endoplasmic reticulum and *trans* Golgi α1,2-mannosidase activity.** S. Hickman, J. L. Theodorakis, J. M. Greco, and P. H. Brown

417 **Differential inhibition of nerve growth factor and epidermal growth factor effects on the PC12 pheochromocytoma line.** P. J. Seeley, A. Rukenstein, J. L. Connolly, and L. A. Greene

427 **Induction of muscle genes in neural cells.** W. E. Wright

436 **Control of differentiation in heterokaryons and hybrids involving differentiation-defective myoblast variants.** W. E. Wright

444 **A chemoattractant receptor on macrophages exists in two affinity states regulated by guanine nucleotides.** R. Snyderman, M. C. Pike, S. Edge, and B. Lane

449 **Synthesis and assembly of the cytoskeleton of *Naegleria gruberi* flagellates.** C. Walsh

457 **Comparison of rapid changes in surface morphology and coated pit formation of PC12 cells in response to nerve growth factor, epidermal growth factor, and dibutyryl cyclic AMP.** J. L. Connolly, S. A. Green, and L. A. Greene

466 **Entry of diphtheria toxin into cells: possible existence of cellular factor(s) for entry of diphtheria toxin into cells was studied in somatic cell hybrids and hybrid toxins.** Y. Kaneda, T. Uchida, E. Mekada, M. Nakanishi, and Y. Okada

473 **Changes in the distribution of the 34-kdalton tyrosine kinase substrate during differentiation and maturation of chicken tissues.** M. E. Greenberg, R. Brackenbury, and G. M. Edelman

487 **The 46,000-dalton tyrosine protein kinase substrate is widespread, whereas the 36,000-dalton substrate is only expressed at high levels in certain rodent tissues.** K. L. Gould, J. A. Cooper, and T. Hunter

498 **Evidence that coated vesicles transport acetylcholine receptors to the surface membrane of chick myotubes.** S. Bursztajn and G. D. Fischbach

507 **Organization of acetylcholine receptor clusters in cultured rat myotubes is calcium dependent.** S. Bursztajn, J. L. McManaman, and S. H. Appel

518 **A new 185,000-dalton skeletal muscle M-line protein detected by monoclonal antibodies.** B. K. Grove, V. Kurer, C. Lehner, T. C. Doetschman, J.-C. Perriard, and H. M. Eppenberger

525 **Tubulin hooks as probes for microtubule polarity: an analysis of the method and an evaluation of data on microtubule polarity in the mitotic spindle.** J. R. McIntosh and U. Euteneuer

534 **Glucocorticoid inhibition of vascular smooth muscle cell proliferation: influence of homologous extracellular matrix and serum mitogens.** J. P. Longenecker, L. A. Kilty, and L. K. Johnson

541 **Glucocorticoids stimulate collagen and noncollagen protein synthesis in cultured vascular smooth muscle cells.** D. C. Leitman, S. C. Benson, and L. K. Johnson

550 **Participation of calcium and calmodulin in the formation of acetylcholine receptor clusters.** H. B. Peng

558 **Light-regulated gene expression during maize leaf development.** T. Nelson, M. H. Harpster, S. P. Mayfield, and W. C. Taylor

565 **A time-lapse video image intensification analysis of cytoplasmic organelle movements during endosome translocation.** B. Herman and D. F. Albertini

577 **Small oligomers of immunoglobulin E (IgE) cause large-scale clustering of IgE receptors on the surface of rat basophilic leukemia cells.** A. K. Menon, D. Holowka, and B. Baird

584 **Association of the cyclic AMP chemotaxis receptor with the detergent-insoluble cytoskeleton of *Dictyostelium discoideum*.** N. J. Galvin, D. Stockhausen, B. L. Meyers-Hutchins, and W. A. Frazier

596 **A lipophilic iron chelator can replace transferrin as a stimulator of cell proliferation and differentiation.** W. Landschulz, I. Thesleff, and P. Ekblom

602 **Sodium butyrate induces histone hyperacetylation and differentiation of murine embryonal carcinoma cells.** P. A. McCue, M. L. Gubler, M. I. Sherman, and B. N. Cohen

609 **Structure and transmembrane nature of the acetylcholine receptor in amphibian skeletal muscle as revealed by cross-reacting monoclonal antibodies.** P. B. Sargent, B. E. Hedges, L. Tsavaler, L. Clemmons, S. Tzartos, and J. M. Lindstrom

619 **Generation of flagella by cultured mouse spermatids.** G. L. Gerton and C. F. Millette

629 **Temperature dependence of protein transport across lymphatic endothelium in vitro.** C. C. C. O'Morchoe, W. R. Jones III, H. M. Jarosz, P. J. O'Morchoe, and L. M. Fox

641 **The brush border cytoskeleton is not static: in vivo turnover of proteins.** R. P. Stidwill, T. Wysolmerski, and D. R. Burgess

646 **Interactions of thrombospondin with extracellular matrix proteins: selective binding to type V collagen.** S. M. Mumby, G. J. Raugi, and P. Bornstein

653 **The hagfish slime gland thread cell. I. A unique cellular system for the study of intermediate filaments and intermediate filament-microtubule interactions.** S. W. Downing, R. H. Spitzer, E. A. Koch, and W. L. Salo

670 **Hagfish slime gland thread cells. II. Isolation and characterization of intermediate filament components associated with the thread.** R. H. Spitzer, S. W. Downing, E. A. Koch, W. L. Salo, and L. J. Saidel

678 **Bud formation by the yeast *Saccharomyces cerevisiae* is directly dependent on "start."** R. A. Singer, D. P. Bedard, and G. C. Johnston

685 **Endocytosis of synaptic vesicle membrane at the frog neuromuscular junction.** T. M. Miller and J. E. Heuser

699 **Are annulate lamellae in the *Drosophila* embryo the result of overproduction of nuclear pore components?** J. P. Stafstrom and L. A. Staehelin

709 **Transient kinetics of a cGMP-dependent cGMP-specific phosphodiesterase from *Dictyostelium discoideum*.** P. J. M. Van Haastert and M. M. Van Lookeren Campagne

717 **Microspectrofluorometry by digital image processing: measurement of cytoplasmic pH.** L. Tanasugarn, P. McNeil, G. T. Reynolds, and D. L. Taylor

725 **Interaction between major histocompatibility complex antigens and epidermal growth factor receptors on human cells.** A. B. Schreiber, J. Schlessinger, and M. Edidin

732 **Recycling of the asialoglycoprotein receptor and the effect of lysosomotropic amines in hepatoma cells.** A. L. Schwartz, A. Bolognesi, and S. E. Fridovich

739 **A rapid decrease in epidermal growth factor-binding capacity accompanies the terminal differentiation of mouse myoblasts in vitro.** R. W. Lim and S. D. Hauschka

748 **Redistribution of alpha-granules and their contents in thrombin-stimulated platelets.** P. E. Stenberg, M. A. Shuman, S. P. Levine, and D. F. Bainton

761 **Unphosphorylated gelsolin is localized in regions of cell-substratum contact or attachment in Rous sarcoma virus–transformed rat cells.** E. Wang, H. L. Yin, J. G. Krueger, L. A. Caliguiri, and I. Tamm

VOLUME 98 NUMBER 3 MARCH 1984

Rapid Communications

1129 **Purified plasma membranes inhibit polypeptide growth factor-induced DNA synthesis in subconfluent 3T3 cells.** R. D. Vale, S. W. Peterson, N. V. Matiuck, and C. F. Fox

1133 **4F2 monoclonal antibody recognizes a surface antigen on spread human fibroblasts of embryonic but not of adult origin.** B. Azzarone, H. Suarez, M.-C. Mingari, L. Moretta, and A. S. Fauci

1138 **Transcription of α- and β-tubulin genes in vitro in isolated *Chlamydomonas reinhardi* nuclei.** L. R. Keller, J. A. Schloss, C. D. Silflow, and J. L. Rosenbaum

1144 **Dual regulation of intermediate filament phosphorylation.** M. E. Gilmartin, J. Mitchell, A. Vidrich, and I. M. Freedberg

1150 **PC12 cells as a source of the neurite-derived cell surface mitogen, which stimulates Schwann cell division.** N. Ratner, L. Glaser, and R. P. Bunge

1157 PLACEMENT SERVICE NOTICES

Perspectives

789 **Genetic and biochemical dissection of the eucaryotic flagellum.** D. J. L. Luck

Regular Articles

795 **Monoclonal antibodies as probes of the distribution of ZP-2, the major sulfated glycoprotein of the murine zona pellucida.** I. J. East and J. Dean

801 **Insulin-induced formation of ruffling membranes of KB cells and its correlation with enhancement of amino acid transport.** K. Goshima, A. Masuda, and K. Owaribe

810 **Substrate adhesion of rat hepatocytes: on the mechanism of attachment to fibronectin.** S. Johansson and M. Höök

818 **Flagellar waveform and rotational orientation in a *Chlamydomonas* mutant lacking normal striated fibers.** H. J. Hoops, R. L. Wright, J. W. Jarvik, and G. B. Witman

825 **Analysis of myofibrillar structure and assembly using fluorescently labeled contractile proteins.** J. W. Sanger, B. Mittal, and J. M. Sanger

834 **Membrane-associated actin in the rhabdomeral microvilli of crayfish photoreceptors.** H. G. de Couet, S. Stowe, and A. D. Blest

847 **10-nm filaments are induced to collapse in living cells microinjected with monoclonal and polyclonal antibodies against tubulin.** S. H. Blose, D. I. Meltzer, and J. R. Feramisco

859 **Malorientation in half-bivalents at anaphase: analysis of autosomal laggards in untreated, cold-treated, and cold-recovering crane fly spermatocytes.** M. A. Janicke and J. R. LaFountain, Jr.

870 **Shift of equilibrium density induced by 3,3′-diaminobenzidine cytochemistry: a new procedure for the analysis and purification of peroxidase-containing organelles.** P. J. Courtoy, J. Quintart, and P. Baudhuin

877 **Receptor-mediated endocytosis in rat liver: purification and enzymic characterization of low density organelles involved in uptake of galactose-exposing proteins.** J. Quintart, P. J. Courtoy, and P. Baudhuin

885 **pH Homeostasis in human lymphocytes: modulation by ions and mitogen.** C. Deutsch, J. S. Taylor, and M. Price

894 **Distribution of urokinase-type plasminogen activator immunoreactivity in the mouse.** L.-I. Larsson, L. Skriver, L. S. Nielsen, J. G. Hansen, P. Kristensen, and K. Danø

904 **Calmodulin-microtubule association in cultured mammalian cells.** W. J. Deery, A. R. Means, and B. R. Brinkley

911 **Visualization of early intramembranous ossification by electron microscopic and electron spectroscopic imaging.** A. L. Arsenault and F. P. Ottensmeyer

922 **Structural rearrangements of tubulin and actin during the cell cycle of the yeast *Saccharomyces*.** J. V. Kilmartin and A. E. M. Adams

934 **Relationship of actin and tubulin distribution to bud growth in wild-type and morphogenetic mutant *Saccharomyces cerevisiae*.** A. E. M. Adams and J. R. Pringle

946 **Structure and properties of an under-sulfated heparan sulfate proteoglycan synthesized by a rat hepatoma cell line.** J. Robinson, M. Viti, and M. Höök

954 **Phosphorylation of some chromosomal nonhistone proteins in active genes is blocked by the transcription inhibtor DRB.** E. Egyházi, A. Pigon, A. Ossoinak, M. Holst, and U. Tayip

963 **Evidence that diphtheria toxin and modeccin enter the cytosol from different vesicular compartments.** K. Sandvig, A. Sundan, and S. Olsnes

971 **Monoclonal antibodies to laminin reveal the heterogeneity of basement membranes in the developing and adult mouse tissues.** Y.-J. Wan, T.-C. Wu, A. E. Chung, and I. Damjanov

980 **Identification of distinct mRNAs for nuclear lamin C and a putative precursor of nuclear lamin A.** J.-F. Laliberté, A. Dagenais, M. Filion, V. Bibor-Hardy, R. Simard, and A. Royal

986 **Radioautographic visualization and biochemical indentification of *O*-phosphoserine- and *O*-phosphothreonine-containing phosphoproteins in mineralizing embryonic chick bone.** W. J. Landis, C. F. Sanzone, D. Brickley-Parsons, and M. J. Glimcher

991 **Structural and functional polarity of canalicular and basolateral plasma membrane vesicles isolated in high yield from rat liver.** P. J. Meier, E. S. Sztul, A. Reuben, and J. L. Boyer

1001 **Identification of a calcium-regulated insulinoma cell phosphoprotein as an islet cell keratin.** U. K. Schubart and K. L. Fields

1010 **Neurite outgrowth of neuroblastoma cells: dependence on adhesion surface–cell surface interactions.** H. Rauvala

1017 **Heterogeneity among microtubules of the cytoplasmic microtubule complex detected by a monoclonal antibody to alpha-tubulin.** W. C. Thompson, D. J. Asai, and D. H. Carney

1026 **To grow mouse mammary cell in culture.** U. K. Ehmann, W. D. Peterson, Jr., and D. S. Misfeldt

1033 **Cultured endothelial cell monolayers that restrict the transendothelial passage of macromolecules and electrical current.** M. B. Furie, E. B. Cramer, B. L. Naprstek, and S. C. Silverstein

1042 **Specific binding of fibronectin-antifibronectin immune complexes to procollagen: a new pitfall in immunostaining.** J. A. McDonald and D. G. Kelley

1048 **"Down regulation" of epidermal growth factor receptors: direct demonstration of receptor degradation in human fibroblasts.** C. M. Stoscheck and G. Carpenter

1054 **Parameters affecting the fusion of unilamellar phospholipid vesicles with planar bilayer membranes.** F. S. Cohen, M. H. Akabas, J. Zimmerberg, and A. Finkelstein

1063 **Separation of the osmotically driven fusion event from vesicle-planar membrane attachment in a model system for exocytosis.** M. H. Akabas, F. S. Cohen, and A. Finkelstein

1072 **Attachment of vimentin filaments to desmosomal plaques in human meningiomal cells and arachnoidal tissue.** J. Kartenbeck, K. Schwechheimer, R. Moll, and W. W. Franke

1082 **Extracellular Na^+ and initiation of DNA synthesis: role of intracellular pH and K^+.** C. P. Burns and E. Rozengurt

1090 **Studies on the expression of the microtubule-associated protein, tau, during mouse brain development, with newly isolated complementary probes.** D. G. Drubin, D. Caput, and M. W. Kirschner

1098 **Failure to release iron from transferrin in a Chinese hamster ovary cell mutant pleiotropically defective in endocytosis.** R. D. Klausner, J. van Renswoude, C. Kempf, K. Rao, J. L. Bateman, and A. R. Robbins

1102 **Bidirectional polymerization of G-actin on the human erythrocyte membrane.** S. Tsukita, S. Tsukita, and H. Ishikawa

1110 **Immunocytochemical localization of the intrinsic factor-cobalamin receptor in dog ileum: distribution of intracellular receptor during cell maturation.** J. S. Levine, R. H. Allen, D. H. Alpers, and B. Seetharam

1118 **Regulation of murine oocyte meiosis: evidence for a gonadotropin-induced, cAMP-dependent reduction in a maturation inhibitor.** R. R. Freter and R. M. Schultz

VOLUME 98 NUMBER 4 APRIL 1984

Rapid Communications

1591 **Identification and characterization of podocalyxin—the major sialoprotein of the renal glomerular epithelial cell.** D. Kerjaschki, D. J. Sharkey, and M. G. Farquhar

1597 **Evidence for the presence of calsequestrin in two structurally different regions of myocardial sarcoplasmic reticulum.** A. O. Jorgensen and K. P. Campbell

1603 **Selective synthesis of mitochondrial proteins by Chinese hamster ovary cells severely starved for various amino acids.** J. W. Chamberlain, J. W. Pollard, and C. P. Stanners

1163 **Internalization and rapid recycling of macrophage Fc receptors tagged with monovalent antireceptor antibody: possible role of a prelysosomal compartment.** I. Mellman, H. Plutner, and P. Ukkonen

1170 **Internalization and degradation of macrophage Fc receptors bound to polyvalent immune complexes.** I. Mellman and H. Plutner

1178 **Purification, morphometric analysis, and characterization of the glycosomes (microbodies) of the protozoan hemoflagellate *Trypanosoma brucei*.** F. R. Opperdoes, P. Baudhuin, I. Coppens, C. De Roe, S. W. Edwards, P. J. Weijers, and O. Misset

1185 **Specific early-G_1 blocks accompanied with stringent response in *Saccharomyces cerevisiae* lead to growth arrest in resting state similar to the G_0 of higher eucaryotes.** H. Iida and I. Yahara

1194 **Mechanism of entry into the cytosol of poliovirus type 1: requirement for low pH.** I. H. Madshus, S. Olsnes, and K. Sandvig

1201 **Adhesivity and rigidity of erythrocyte membrane in relation to wheat germ agglutinin binding.** E. Evans and A. Leung

1209 ***Zonulae occludentes* in junctional complex-enriched fractions from mouse liver: preliminary morphological and biochemical characterization.** B. R. Stevenson and D. A. Goodenough

1222 **Roles of cytosol and cytoplasmic particles in nuclear envelope assembly and sperm pronuclear formation in cell-free preparations from amphibian eggs.** M. J. Lohka and Y. Masui

1231 **Isolation and characterization of keratin-like proteins from cultured cells with fibroblastic morphology.** R. V. Zackroff, A. E. Goldman, J. C. R. Jones, P. M. Steinert, and R. D. Goldman

1238 **Emergence of a surface immunoglobulin recycling process during B lymphocyte differentiation.** B. Goud and J.-C. Antoine

1247 **Cell cycle dynamics of an M-phase specific cytoplasmic factor in *Xenopus laevis* oocytes and eggs.** J. Gerhart, M. Wu, and M. Kirschner

1256 ***Plasmodium falciparum* malaria: association of knobs on the surface of infected erythrocytes with a histidine-rich protein and the erythrocyte skeleton.** J. H. Leech, J. W. Barnwell, M. Aikawa, L. H. Miller, and R. J. Howard

1265 **Chemotactic peptide modulation of actin assembly and locomotion in neutrophils.** T. H. Howard and W. H. Meyer

1272 **Myelin-associated glycoprotein and myelinating Schwann cell-axon interaction in chronic B,B′-iminodipropionitrile neuropathy.** B. D. Trapp, R. H. Quarles, and J. W. Griffin

1279 **Intracellular control of axial shape in non-uniform neurites: a serial electron microscopic analysis of organelles and microtubules in AI and AII retinal amacrine neurites.** S. E. Sasaki-Sherrington, J. R. Jacobs, and J. K. Stevens

1291 **Immunoreactive myelin basic proteins are not detected when shiverer mutant Schwann cells and fibroblasts are co-cultured with normal neurons.** H. D. Shine and R. L. Sidman

1296 **Packing of a specific gene into discrete higher order structures following repression of RNA synthesis.** K. Andersson, B. Björkroth, and B. Daneholt

1304 **Viral glycoproteins destined for apical or basolateral plasma membrane domains traverse the same Golgi apparatus during their intracellular transport in doubly infected Madin-Darby canine kidney cells.** M. J. Rindler, I. E. Ivanov, H. Plesken, E. Rodriguez-Boulan, and D. D. Sabatini

1320 **Higher order structure in a short repeat length chromatin.** J. Allan, D. C. Rau, N. Harborne, H. Gould

1328 **Interferon suppresses pinocytosis but stimulates phagocytosis in mouse peritoneal macrophages: related changes in cytoskeletal organization.** E. Wang, J. Michl, L. M. Pfeffer, S. C. Silverstein, and I. Tamm

1342 **Biochemical analysis of mutants of a macrophage cell line resistant to the growth-inhibitory activity of interferon.** Y. Nagata, O. M. Rosen, M. H. Makman, and B. R. Bloom

1348 **Decreased membrane deformability in Melanesian ovalocytes from Papua New Guinea.** A. Saul, G. Lamont, W. H. Sawyer, and C. Kidson

1355 **Inhibition of neurite initiation and growth by taxol.** P. C. Letourneau and A. H. Ressler

1363 **Immunoprecipitation of nonerythrocyte spectrin within live cells following microinjection of specific antibodies: relation to cytoskeletal structures.** P. H. Mangeat and K. Burridge

1378 **Rapid modulation of *N*-formyl chemotactic peptide receptors on the surface of human granulocytes: formation of high-affinity ligand-receptor complexes in transient association with cell cytoskeleton.** A. J. Jesaitis, J. R. Naemura, L. A. Sklar, C. G. Cochrane, and R. G. Painter

1388 **Classification of epidermal keratins according to their immunoreactivity, isoelectric point, and mode of expression.** R. Eichner, P. Bonitz, and T.-T. Sun

1397 **Monoclonal antibody analysis of keratin expression in epidermal diseases: a 48- and a 56-kdalton keratin as molecular markers for hyperproliferative keratinocytes.** R. A. Weiss, R. Eichner, and T.-T. Sun

1407 **Human epithelial cell intermediate filaments: isolation, purification, and characterization.** M. W. Aynardi, P. M. Steinert, and R. D. Goldman

1422 **Components of the plasma membrane of growing axons. I. Size and distribution of intramembrane particles.** R. K. Small and K. H. Pfenninger

1434 **Components of the plasma membrane of growing axons. II. Diffusion of membrane protein complexes.** R. K. Small, M. Blank, R. Ghez, and K. H. Pfenninger

1444 **Components of the plasma membrane of growing axons. III. Saxitoxin binding to sodium channels.** G. R. Strichartz, R. K. Small, and K. H. Pfenninger

1453 **Influence of basal lamina on the accumulation of acetylcholine receptors at synaptic sites in regenerating muscle.** U. J. McMahan and C. R. Slater

1474 **Laminin and fibronectin promote the haptotactic migration of B16 mouse melanoma cells in vitro.** J. B. McCarthy and L. T. Furcht

1481 **Disassembly and reconstitution of a membrane-microtubule complex.** J. M. Murray

1488 **A domain-specific marker for the hepatocyte plasma membrane. II. Ultrastructural localization of leucine aminopeptidase to the bile canalicular domain of isolated rat liver plasma membranes.** L. M. Roman and A. L. Hubbard

1497 **A domain-specific marker for the hepatocyte plasma membrane. III. Isolation of bile canalicular membrane by immunoadsorption.** L. M. Roman and A. L. Hubbard

1505 **Microdomains of distinctive glycoprotein composition in the kidney proximal tubule brush border.** D. Kerjaschki, L. Noronha-Blob, B. Sacktor, and M. G. Farquhar

1514 **Localization of C-protein isoforms in chicken skeletal muscles: ultrastructural detection using monoclonal antibodies.** J. E. Dennis, T. Shimizu, F. C. Reinach, and D. A. Fischman

1523 **Organization of mammalian neurofilament polypeptides within the neuronal cytoskeleton.** N. Hirokawa, M. A. Glicksman, and M. B. Willard

1537 **Plasma membrane coat and a coated vesicle-associated reticulum of membranes: their structure and possible interrelationship in *Chara corallina*.** T. C. Pesacreta and W. J. Lucas

1546 **Expression of transformation-associated protease(s) that degrade fibronectin at cell contact sites.** W.-T. Chen, K. Olden, B. A. Bernard, and F.-F. Chu

1556 **A method for incorporating macromolecules into adherent cells.** P. L. McNeil, R. F. Murphy, F. Lanni, and D. L. Taylor

1565 **Role of calcium and calmodulin in hemidesmosome formation in vitro.** V. Trinkaus-Randall and I. K. Gipson

1572 **Role of anchorin CII, a 31,000-mol-wt membrane protein, in the interaction of chondrocytes with type-II collagen.** J. Mollenhauer, J. A. Bee, M. A. Lizarbe, and K. von der Mark

1580 **Endogenous mammalian lectin localized extracellularly in lung elastic fibers.** R. F. Cerra, P. L. Haywood-Reid, and S. H. Barondes

Rapid Communications

1895 **Glial fibrillary acidic protein is localized in the lens epithelium.** J. S. Hatfield, R. P. Skoff, H. Maisel, and L. Eng

1899 **Biogenesis of the avian erythroid membrane skeleton: receptor-mediated assembly and stabilization of ankyrin (goblin) and spectrin.** R. T. Moon and E. Lazarides

1905 **A localized surface protein of guinea pig sperm exhibits free diffusion in its domain.** D. G. Myles, P. Primakoff, and D. E. Koppel

Regular Articles

1611 **Isolation and characterization of a high molecular weight actin-binding protein from *Physarum polycephalum* plasmodia.** K. Sutoh, M. Iwane, F. Matsuzaki, M. Kikuchi, and A. Ikai

1619 **Radioautographic visualization of differences in the pattern of [^{3}H]uridine and [^{3}H]orotic acid incorporation into the RNA of migrating columnar cells in rat small intestine.** M. Uddin, G. G. Altmann, and C. P. Leblond

1630 **Presence of an extensive clathrin coat on the apical plasmalemma of the rat kidney proximal tubule cell.** J. S. Rodman, D. Kerjaschki, E. Merisko, and M. G. Farquhar

1637 **Monoclonal antibodies against chicken type IV and V collagens: electron microscopic mapping of the epitopes after rotary shadowing.** R. Mayne, H. Wiedemann, M. H. Irwin, R. D. Sanderson, J. M. Fitch, T. F. Linsenmayer, and K. Kühn

1645 **Uptake of calcium by the endoplasmic reticulum of the frog photoreceptor.** F. Ungar, I. Piscopo, J. Letizia, and E. Holtzman

1656 **Collagenase is a major gene product of induced rabbit synovial fibroblasts.** J. Aggeler, S. M. Frisch, and Z. Werb

1662 **Changes in cell shape correlate with collagenase gene expression in rabbit synovial fibroblasts.** J. Aggeler, S. M. Frisch, and Z. Werb

1672 **Recognition and invasion of human erythrocytes by malarial parasites: contribution of sialoglycoproteins to attachment and host specificity.** M. J. Friedman, T. Blankenberg, G. Sensabaugh, and T. S. Tenforde

1678 **Diffusion and regionalization in membranes of maturing ram spermatozoa.** D. E. Wolf and J. K. Voglmayr

1685 **Regeneration of the active zone at the frog neuromuscular junction.** C.-P. Ko

1696 **Immunocytochemical studies on the localization of plasma and of cellular retinol-binding proteins and of transthyretin (prealbumin) in rat liver and kidney.** M. Kato, K. Kato, and D. S. Goodman

1705 **Radioautographic characterization of successive compartments along the rough endoplasmic reticulum–Golgi pathway of collagen precursors in foot pad fibroblasts of [^{3}H]proline-injected rats.** F. Marchi and C. P. Leblond

1711 **Hormone-induced intercellular signal transfer dissociates cAMP-dependent protein kinase.** S. A. Murray and W. H. Fletcher

1720 **Glucose removal from N-linked oligosaccharides is required for efficient maturation of certain secretory glycoproteins from the rough endoplasmic reticulum to the Golgi complex.** H. F. Lodish and N. Kong

1730 **The interconversion of metaphase and interphase microtubule arrays, as studied by the injection of centrosomes and nuclei into *Xenopus* eggs.** E. Karsenti, J. Newport, R. Hubble, and M. Kirschner

1746 **Heterotypic binding between neuronal membrane vesicles and glial cells is mediated by a specific cell adhesion molecule.** M. Grumet and G. M. Edelman

1757 **Endosome pH measured in single cells by dual fluorescence flow cytometry: rapid acidification of insulin to pH 6.** R. F. Murphy, S. Powers, and C. R. Cantor

1763 **Role of the centrosome in organizing the interphase microtubule array: properties of cytoplasts containing or lacking centrosomes.** E. Karsenti, S. Kobayashi, T. Mitchison, and M. Kirschner

1777 **Studies on the development and maintenance of epithelial cell surface polarity with monoclonal antibodies.** D. A. Herzlinger and G. K. Ojakian

1788 **Immunocytochemical localization of opsin in the cell membrane of developing rat retinal photoreceptors.** I. Nir, D. Cohen, and D. S. Papermaster

1796 **Ca^{2+}-dependent binding of severin to actin: a one-to-one complex is formed.** R. G. Giffard, A. G. Weeds, and J. A. Spudich

1804 **Extracellular matrix-specific induction of elastogenic differentiation and maintenance of phenotypic stability in bovine ligament fibroblasts.** R. P. Mecham, J. G. Madaras, and R. M. Senior

1813 **Appearance of chemotactic responsiveness to elastin peptides by developing fetal bovine ligament fibroblasts parallels the onset of elastin production.** R. P. Mecham, G. L. Griffin, J. G. Madaras, and R. M. Senior

1817 **Exocytotic exposure and retrieval of membrane antigens of chromaffin granules: quantitative evaluation of immunofluorescence on the surface of chromaffin cells.** A. Patzak, G. Böck, R. Fischer-Colbrie, K. Schauenstein, W. Schmidt, G. Lingg, and H. Winkler

1825 **Endogenous glycosyltransferases glucosylate lipids in flagella of *Euglena*.** S.-J. Chen and G. B. Bouck

1836 **Structure of (Na^+,K^+)-ATPase as revealed by electron microscopy and image processing.** M. Mohraz and P. R. Smith

1842 **Monoclonal antibodies to dynein subunits reveal the existence of cytoplasmic antigens in sea urchin egg.** G. Piperno

1851 **The structural organization of $(Na^+ + K^+)$-ATPase in purified membranes.** G. Zampighi, J. Kyte, and W. Freytag

1865 **Alteration of tight junctional permeability in the rat parotid gland after isoproterenol stimulation.** M. R. Mazariegos, L. W. Tice, and A. R. Hand

1873 **A new method of preparing embeddment-free sections for transmission electron microscopy: applications to the cytoskeletal framework and other three-dimensional networks.** D. G. Capco, G. Krochmalnic, and S. Penman

1886 **Preparation of nuclear matrices from cultured cells: subfractionation of nuclei in situ.** M. Staufenbiel and W. Deppert

1911 PLACEMENT SERVICE NOTICES

VOLUME 98 NUMBER 6 JUNE 1984

Rapid Communications

2239 **Ultrastructural localization of the M_r 43,000 protein and the acetylcholine receptor in *Torpedo* postsynaptic membranes using monoclonal antibodies.** R. Sealock, B. E. Wray, and S. C. Froehner

2245 **Co-translational excision of α-glucose and α-mannose in nascent vesicular stomatitis virus G protein.** P. H. Atkinson and J. T. Lee

2250 **Stimulated release of histamine by a rat mast cell line is inhibited during mitosis.** T. R. Hesketh, M. A. Beaven, J. Rogers, B. Burke, and G. B. Warren

2255 ACKNOWLEDGMENT OF THE REVIEWERS

2259 AUTHOR INDEX FOR VOLUME 98

Regular Articles

1919 **Mechanism of regulation of actin polymerization by *Physarum* profilin.** K. Ozaki and S. Hatano

1926 **Chick myotendinous antigen. I. A monoclonal antibody as a marker for tendon and muscle morphogenesis.** M. Chiquet and D. M. Fambrough

1937 **Chick myotendinous antigen. II. A novel extracellular glycoprotein complex consisting of large disulfide-linked subunits.** M. Chiquet and D. M. Fambrough

1947 **Latex beads as probes of a neural crest pathway: effects of laminin, collagen, and surface charge on bead translocation.** M. Bronner-Fraser

1961 **Distributions of vimentin and desmin in developing chick myotubes in vivo. I. Immunofluorescence study.** K. T. Tokuyasu, P. A. Maher, and S. J. Singer
